

# UDAPEOPLE

**A revolutionary concept in Human Resources  
which promises to help small businesses care  
better for their most valuable resource: their  
people.**

# CI/CD FOR UDAPEOPLE

- Continuous Integration to enable merging working copies of different developers to one shared mainline several times a day
- Continuous Deployment to release product features in shorter cycles through automated deployments
- Continuous Delivery to deliver value to customers more frequently in short duration

# BENEFITS

- Reduced Cost

CI would enable developers to save time on issues from other developers code. CD would help in automated cleanups, hence reducing the cost from unused resources.

- Increased Revenue

New value generating features can be released more quickly through automated processes, providing less time to market.

- Avoided Cost

Using CI/CD would avoid costs due to manual human errors, prevent costly bugs, security holes and less time in testing.

- Protected Revenue

CD would enable quick rollback to working state in case of any deploy related crashes or bugs.
